GeoNode Install/Config

- Dramatically Improved packaging in 2.0
- Still working on upgrade path from 1.x
- Ubuntu still preferred platform, CentOS and Windows coming before 2.0 Final

GeoNode Customization

- Theme / Look and Feel – Logos, Colors etc
- Adding Additional Django Apps
- Customized Client Applications
- Federating with other OGC Servers

How you can get involved

- User Testing
- Test the 2.0 alphas and betas
- File issues in the issue tracker
- Ask questions on the mailing lists
- Development Use Cases

Q & A
