LED Session #3: How can we Support the Employment of Vulnerable Youth During and After COVID-19?

Interesting Resources Relevant to the Session

1. **Youth Employment and COVID Brief**: This latest S4YE Knowledge Brief highlights six trends among in youth employment programs in response to COVID. These include scaling virtual operations, crowdsourcing ideas from youth, accelerating remote learning, encouraging youth voice, increased support for micro, small and medium enterprises, and leveraging new growth opportunities. Projects are increasingly using digital technology to be efficient and scale impact. Projects have pivoted to reach young people through cost-effective digital channels like social media, WhatsApp, SMS, and interactive voice recordings (IVR). Some projects are also integrating advanced technology, like AI, for automating nuanced processes like candidate selection. Projects are expanding access to remote learning. Linear classroom content has been reworked into more bite-sized, self-paced, online learning modules. There is also an increase in developing mobile learning apps to reach underserved youth without laptops, particularly in areas with low connectivity. Radio learning is being used by some of our partners in East Africa. Additionally, projects are working to help youth overcome specific barriers to access digital jobs and entrepreneurship.
