

Measuring Social Capital and Social Cohesion

JEEYON KIM

Senior Resilience Researcher, Mercy Corps

RYAN SHEELY

Director of Research, Governance and Conflict, Mercy Corps

Outline of Presentation

- 1. Background and Motivation
- 2. Project process and methods
- 3. Definitions
 - Social capital
 - Social cohesion
- 4. Overview of Toolkit and survey questions
- 5. Examples: Adapting survey questions to context
- 6. Next steps
 - Validation and refinement
 - Field use and COVID-19 adaptations

Background: The Origins of the Toolkit

- Motivation: Challenges measuring impact of CDD interventions on social capital and social cohesion
 - Methodological challenges
 - Practical challenges
- Multiple Streams of Related Programming and Research at Mercy Corps
 - Resilience
 - Governance
 - Peace and Conflict
- Output: Methodological Toolkit
- Intended Audience: Governments, development partners, and World Bank task teams

Project Process and Methods

Step 1:Literature Search

Methods

- 25 targeted keyword searches
- · Emphasis on CDD, Migration, FCA
- Recommendations from experts
- Snowball sampling from citations

Step 2: Mapping Dimensions Measured in Literature

Methods

- Scope for inclusion in review:
- Attempt to measure Social Capital/Social Cohesion
- 68 Sources fit scope
- Identification of dimensions identified in each study
- 23 total dimensions identified in literature

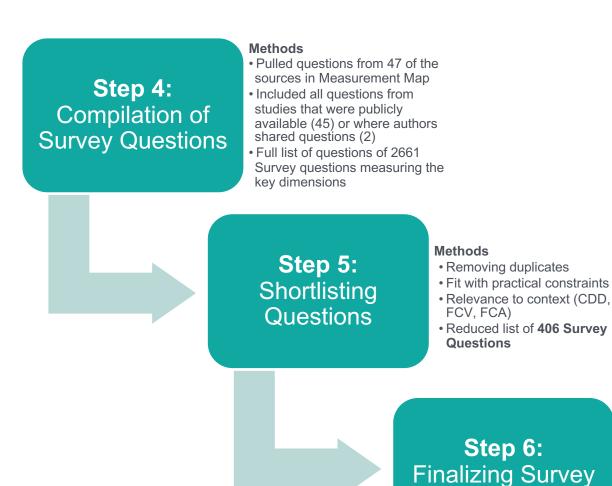

Step 3:

Development of Definitions and Conceptual Framework

Methods

- Narrowing 23 dimensions in literature to 8 key dimensions
- Working definitions of Social Capital, Social Cohesion, and each dimension
- Process/Criteria: Used Literature
 + CDD Theory of Change to narrow/combine scope

Project Process and Methods

Methods

Questions

- Evaluating shortlist questions on degree of match with definition and use, relevance to context, and quality
- Selection of final list of 15 questions
- Refining question/ answer wording
- Development of qualitative guide

Definition: Social Capital

| DIMENSION | DEFINITION | SOURCE |
|-------------------------|---|---|
| SOCIAL CAPITAL | The quantity and quality of resources, trust, and norms inhering in individuals' relationships. | Woolcock 1998; Bhuiyan & Evers (ZEF) 2005 |
| RELATIONSHIPS | The nature and strength of an individual's network connections with other individuals in homogeneous groups (bonding), across groups (bridging), or with individuals in positions of authority or influence (linking). | Scrivens & Smith (OECD) 2017; Mercy Corps (2017) |
| RESOURCES | Material and non-material support (e.g. goods, materials, information) received by and provided to individuals. | Scrivens & Smith (OECD) 2017; REACH 2016 |
| TRUST | An individual's 1) belief that another individual, group, or institution that could do her harm or betray her will not do so and 2) willingness to take actions that make herself vulnerable to that actor. | Levi & Stoker 2000; Gambetta 2000; Ostrom & Ahn 2009; Gilligan, Pasquale, & Samii 2013; Scrivens & Smith 2013 |
| COLLECTIVE ACTION NORMS | Collectively shared and internalized moral prescriptions that encourage costly actions that primarily benefit others. | Ostrom 1998; Ostrom 2005; Ostrom & Ahn 2009; Fehr & Fischbacher 2003; Benabou & Tirole 2005 |

Definition: Social Cohesion

| DII | MENSION | DEFINITION | SOURCE |
|------------------------------|------------|---|--|
| SOCIA | L COHESION | A sense of shared purpose and trust among members of a given group or locality and the willingness of those group members to engage and cooperate with each other to survive and prosper. | Stanley 2003; Chan et al. 2006; Mvukiyehe 2011 SIPA 2018 |
| | TRUST | An individual's 1) belief that another individual, group, or institution that could do her harm or betray her will not do so and 2) willingness to take actions that make herself vulnerable to that actor. | Levi & Stoker 2000; Gambetta 2000; Ostrom & Ahn 2009; Gilligan, Pasquale, & Samii 2013; Scrivens & Smith 2013 |
| COLLECTIVE ACTION NORMS | | Collectively shared and internalized moral prescriptions that encourage costly actions that primarily benefit others. | Ostrom 1998; Ostrom 2005; Ostrom & Ahn 2009; Fehr & Fischbacher 2003; Benabou & Tirole 2005 |
| | BELONGING | The degree to which an individual or collective group feel like they "fit" together | Pham & Vinck (UNICEF) 2017 |
| SHARED PURPOSE | IDENTITY | The characteristics that an individual or collective group believe to define them. | Pham & Vinck (UNICEF) 2017 |
| ATTITUDES TOWARD OUT- GROUPS | | How individuals perceive people with other values, lifestyles, or identities within their group or locality. | Larsen, Koch, & Dragolov 2013; Janmaat & Keating 2019; Bogardus 1925 |
| CIVIC E | NGAGEMENT | The attitudes and behaviors of individuals that result in participation to improve local area conditions for others and/or help shape the area's future. | Adler & Goggin 2005 |

Overview of the Toolkit

Toolkit is a living document, composed of two data collection components:

- 1) A set of **15 survey questions** that measure the dimensions of social capital and social cohesion
- 2) A qualitative contextualization guide used to adapt survey module to evaluation context

Step-by-step guide to using toolkit:

Step 1: Review Description of Definitions and Survey Questions

Step 2: Prepare to Use Qualitative Tools

Step 3: Conduct Rapid Qualitative Research

Step 4: Review Qualitative Results and Adapt Survey Questions

Step 5: Collect Survey Data

Step 6: Consider Analysis, Validation, and Index Construction

Relationships and Resources

| DIMENSION | QUESTION | SOURCE |
|---------------|---|---------------------------------|
| RELATIONSHIPS | How close do you feel to each of the following types of individual: [Record response for each type of individual in a relationship list generated from the qualitative research. The contextualized relationship list should include three types of individuals: a. Individuals from my [social group] b. Individuals from a different [social group] c. Individuals/organizations/ institutions representing linking relationships between social networks with differing levels of power or social status] | REACH 2016 |
| RESOURCES | Now I will ask you some questions about whether your household will be able to lean on others for support during difficult times. By difficult times I mean times when there is loss of a family member, loss of income, hunger, drought, flood, conflict or similar events. And by support, I include all types of support no matter how small or big including but not limited to emotional support, food, information about jobs, local decision-making, and loans/credit. In difficult times, will your household be able to lean on each of the following types of people: [Use same relationship list used in Survey Question 1] Will these people that you will be able to lean on during your difficult times also be able to lean on you for support during their difficult times? [Use same relationship list used in Survey Question 1] | Woodson et al. (ILR) 2016 |

Trust and Collective Action Norms

| DIMENSION | QUESTION | SOURCE |
|----------------------|---|--|
| TRUST | Please tell me the degree to which you agree or disagree with the following statement: The following types of people are likely to take advantage of you. [Use same relationship list used in Survey Question 1] | Esenaliev et al. (SIPRI/IPPA) 2018 |
| | Please tell me the degree to which you agree or disagree with the following statement: If I was at a [CDD geographic unit] meeting and accidentally left [my wallet] behind, I believe that the person who found it would return it to me. | Casey, Glennerster, & Miguel 2010 |
| COLLECTIVE ACTION | Please tell me the degree to which you agree or disagree with the following statement: I think that it is important to help in [CDD geographic unit] activities. | SIPA 2018 |
| NORMS | Please tell me the degree to which you agree or disagree with the following statement: In my [CDD geographic unit], it is generally expected that people will help in [CDD geographic unit] activities. | Narayan & Cassidy 2001 |

Belonging and Identity

| DIMENSION | QUESTION | SOURCE |
|-----------|---|---|
| BELONGING | Please tell me the degree to which you agree or disagree with the following statement: I feel left out of [CDD geographic unit] | Grootaert & Van Bastelar (World Bank SOCAT) 2002 |
| | Please tell me the degree to which you agree or disagree with the following statement: Everyone living in this [CDD geographic unit] feels like they are a part of this [CDD geographic unit] | Narayan & Cassidy 2001 |
| IDENTITY | Please indicate the degree to which you agree or disagree with the following statements: Being is an important part of how I see myself: a. A resident of my [CDD geographic unit] b. A member of my [Social Group] | Kuhnt et al. 2017 |
| | Please tell me the degree to which you agree or disagree with the following statement: If the people living in this [CDD geographic unit] were planning something, I'd think of it as something "we" were doing rather than "they" were doing. | Buckner 1988 |

Attitudes Toward Out-groups and Civic Engagement

| DIMENSION | QUESTION | SOURCE |
|-----------------------|---|---|
| ATTITUDES | I'm going to ask you a series of questions about how you view people from a different [Social Group(s)]. a. Should people from a different [Social Group] as you be fully welcomed in this [CDD geographic | Barron et al. (World Bank) 2009 |
| TOWARD OUT- GROUPS | unit]? b. Should people from a different [social group] as you be allowed to participate in [CDD geographic unit] development activities? c. Should people from a different [Social Group] as you be allowed to become leaders of the [CDD geographic unit]? | |
| | d. Would you welcome people from a different [Social Group] as you into your family through marriage? | |
| | Please tell me the degree to which you agree or disagree with the following statement: | Kuhnt et al. 2017 |
| | I feel like an active member of the [CDD geographic unit] I am currently living in. | |
| CIVIC | How often do you participate in meetings to improve public spaces in [CDD geographic unit]? | Betanzo, Alcalá, & Aldana 2015 |
| ENGAGEMENT | If there was a problem that affected the entire [CDD geographic unit], which of the following statements do you most agree with: | Buckner 1988 |
| | a. Each individual would try to solve the problem independently; b. The individuals in each [Social Group] would try to solve the problem together; c. [Add other statements depending on number of social groups] d. The individuals in the entire [CDD geographic unit] would try to solve the problem together. | |

Adapting to Context- Examples for Social Capital

| DIMENSION | QUESTION | SOURCE |
|---------------|--|---------------|
| RELATIONSHIPS | How close do you feel to each of the following types of individual: [Record response for each type of individual in a relationship list generated from the qualitative research. The contextualized relationship list should include three types of individuals: a. Individuals from my [social group] b. Individuals from a different [social group] c. Individuals/organizations/ institutions representing linking relationships between social networks with differing levels of power or social status] | REACH 2016 |

Identify relevant bonding, bridging, and linking relationships

- Need to identify main social divisions and groups relevant for CDD implementation context:
 - Social group 1: Tribe;
 - Social group 2: Age.
- Need to identify decision-makers, and individuals of authority/influence relevant to context:
 - Decision-maker 1: Chief
 - Decision-maker 2: Member of County Assembly
 - Other influential individual 1: Chairperson of a local NGO
 - Other influential individual 2: Large landowner

Adapting to Context- Examples for Social Capital (cont.)

How close do you feel to each of the following types of individual:

Individuals from **my tribe**Bonding

Individuals from my age group

Individuals from a different tribe

Bridging Individuals from a different age group

The Chief for this location

The Member of the County Assembly for this ward

Chairperson of a local NGO

Large Landowner

Linking

1. Not at all close

2. Not Close

3. Close

4. Very close

777. Do not know anyone from this group

from this group

888. Do not know

999. Refused to answer

Adapting to Context- Examples for Social Cohesion

| DIMENSION | QUESTION | SOURCE |
|-----------|--|----------------------|
| IDENTITY | Please indicate the degree to which you agree or disagree with the following statements: Being is an important part of how I see myself: a. A resident of my [CDD geographic unit] b. A member of my [Social Group] | Kuhnt et al. 2017 |
| | | |

Identify name of CDD geographic unit:

- What is the local word for the unit at which CDD subprojects and meetings are being implemented in this context?
 - o E.g. village, neighborhood, block, boma, district coordination committees, town center

Please indicate the degree to which you agree or disagree with the following statements:

Being a resident of **my town center** is an important part of how I see myself Being a member of **my tribe** is an important part of how I see myself Being a member of **my age group** is an important part of how I see myself

- 1. Strongly disagree
- 2. Disagree
- 3. Neither disagree nor agree
- 4. Agree
- 5. Strongly agree

888. Do not know

999. Refuse to answer

MEASURING SOCIAL CAPITAL AND SOCIAL COHESION

Next Steps: Validation and Refinement

Several important validation considerations to keep in mind when preparing for analysis and interpretation:

- Construct Validation and Index Construction
- Cross-Context Validation
- Comparison with Other Survey
 Tools and Indices

Next Steps: Field Use and COVID-19 Adaptations

Planned next step is rolling out toolkit in planned evaluations, but need to adapt given restrictions on movement due to COVID-19:

- Using desk research, expert consultations, and remote interviewing for qualitative contextualization
- Using Mobile Phone Surveys
- Use of ICT Platforms in CDD Program Interventions?
