

Lessons learned from the Study tour and workshop

By:

Ethiopian Delegation

- Connect the unconnected; critical to have different approach for servicing the poor(SABEPS)
- Effective urban planning critical for inclusive local development (e.g capela do so Corro neighbour hood)
- Critical to resettle informal settlers insitu (within existing location)
- Protection of Water Sources Area: we should pay due attention to water sources
 - Increase water quantity
 - Prevent water contamination through community consultation and participation and other stakeholders
 - Other benefits: Green space and play ground
- PPP: water supply and sanitation provision more effective when involving the private sector(SABEPS);
- Separating operational and regulation of water and sewerage services. Regulatory set tariff and not the operator.
- Urban Park curriculum to teach children
- More Understanding required on how Sao-polo governance arrangement works in practiced with 38 municipalities(
