3. Creating a dynamic Palembang City as a competitive regional, national and international development node and being competitive by ensuring a sense of security for investing
4. Realizing innovative and creative people's economy and high competitiveness
5. Making Palembang City a river of tourism and world-class sporting events that are harmonious between human life and nature

Gedung Tempal Walikota Bekantor
Dusun Water Leidang

Workshop integrated urban water management (IUWM)

Things obtained in the workshop:

1. Being a moment of sharing experience, knowledge and learning from experts
2. Become a means of socializing and gathering between regions
3. Provide a separate inspiration in solving a problem
4. Change the mindset in performing, facing and solving problems
5. Demonstrating a reputation for urban development that has been achieved in a positive context

Target to be achieved (As A City Vision):

PALEMBANG EMAS DARUSSALAM

Elok, Madani, Aman, Sejahtera, Darussalam (EMAS)

Means

Clean, beautiful, organized, comfortable, based on mastery technology that is qualified, prosperous, a quality standard of living, safe, peace and harmony.

Challenge

Challenges that arise to realize this vision, the most important is solving the problem of standing water (floods), good sanitation and access to good clean water.

Target to be priority:

1. FLOODS
2. SANITATION
3. CLEAN WATER

Related and most applicable due the workshop:

Good cooperation between the government, local parliament and the community.

Action Step

FAP Floods Action Plan

- 1. Infiltration wells and biopores**
- 2. Re-normalization of closed tributaries through mutual cooperation programs**
- 3. Installation of pump pumps floods at several points of inundation**
- 4. Re-develop riverbanks area**
- 5. Socialization to the community to implement a healthy lifestyle by not littering**

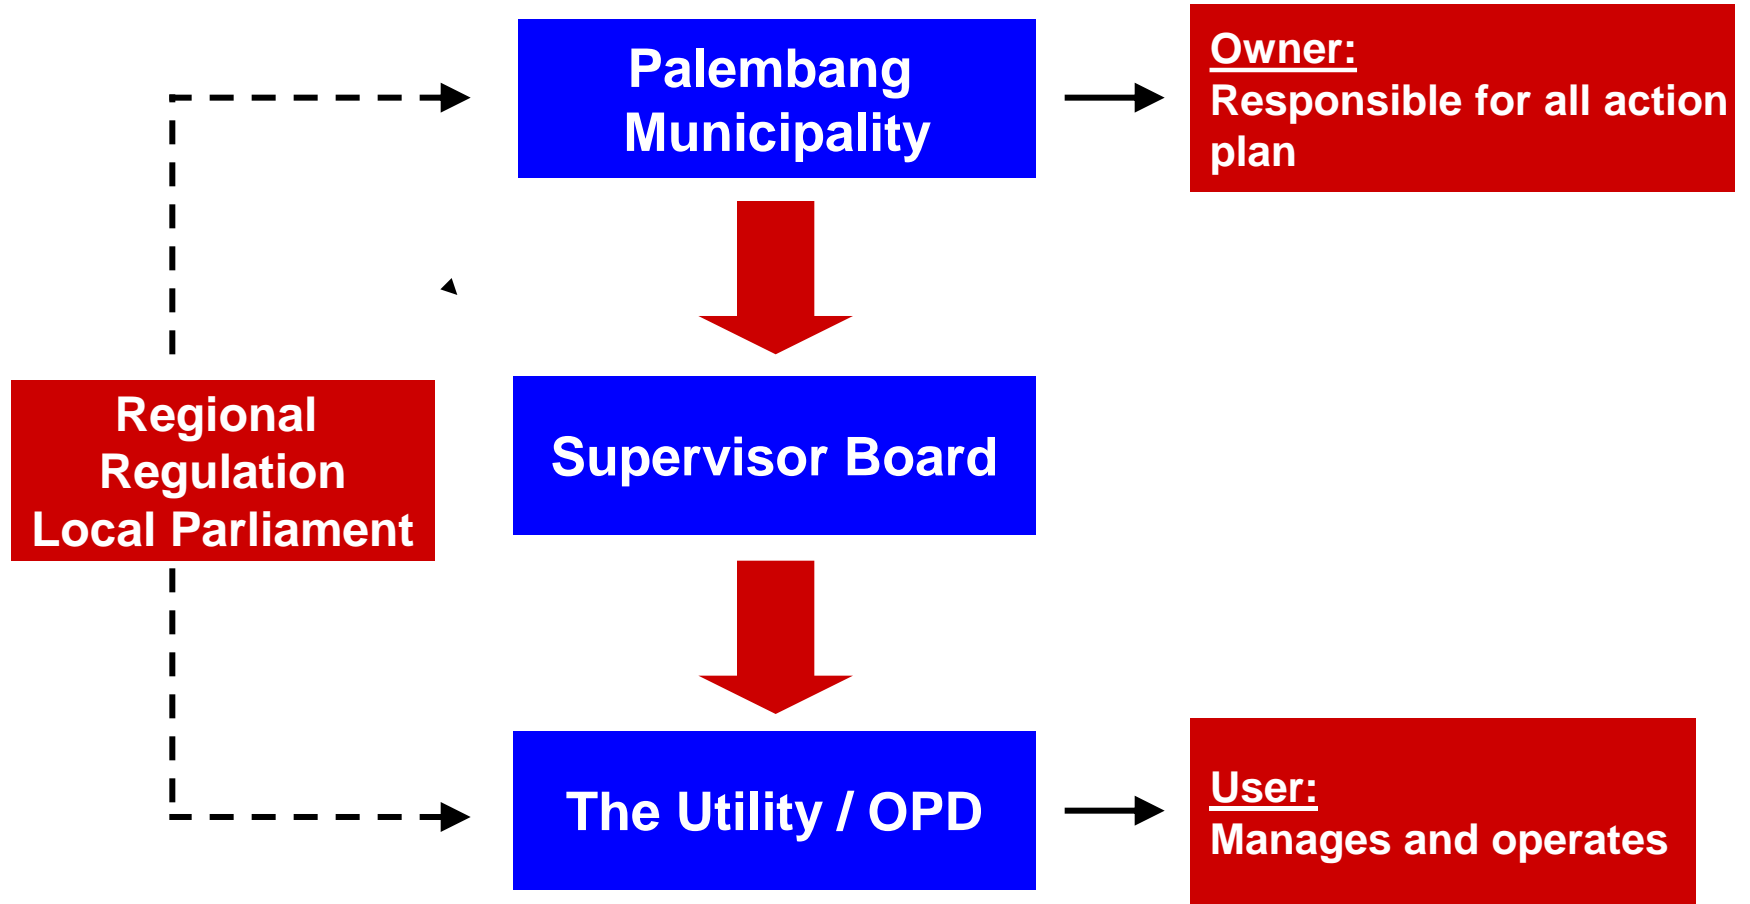

***SAP* Sanitation Action Plan**

- 1. Making communal WWTP**
- 2. Provision of integrated waste disposal facilities**
- 3. Socialization and approach to the community**

***WAP* Water Action Plan**

- 1. Installed Capacity**
- 2. Reduce NRW**
- 3. Number of costumer**
- 4. Level of service coverage**
- 5. Revenue**

Barriers

In achieving the goals that become the vision, of course there are things that can be a barrier or an obstacle in achieving them, one of which is too strong a political influence, a low level of public awareness.

Support

The realization of this action plan certainly requires the support of all parties, the government, local parliaments, the community, and of course also from outside parties, in this case one of them is the World Bank, technical guidance, transfer knowledge, etc

Thank You
