

TANZANIA SWM TDD ACTION PLAN

September 28, 2018; TOKYO

KEY TAKE AWAYS FROM SWM TECHNICAL DEEP DIVE

- Operation and Maintenance for SWM facilities should be properly planned and integrated in Govt budget (ring fence the budget/ business plan).
- Proper resources utilization – SWM equipment's and staff's
- To educate decision makers on importance of 3Rs practice in SWM
- Community/ Private sector engagement in planning, management and coordination of SWM.
- Guidance for Separate Collection of Wastes. .
- Learned experiences of SWM from other Countries.

Existing situation

Kibele dump site burning

Waste pickers

TANZANIA – ACCOMPLISHMENTS NEEDED

- The need of central government to subsidize SWM activities (O & M) costs.
- The importance of Community Engagement and education in Solid wastes management.
- The Importance of the capacity building in emerging technologies on SWM

TANZANIA – ACTION TO BE TAKEN

- **Short-term:**

- Integrated coordination among various stakeholders by GoZ/ ZUMC within 6months.
- Enforcement of law and regulations pertain to solid waste management (GOZ; 6 months).

- **Medium-term:**

- Persistently Community meeting on best practice and knowledge sharing of recycling and collection of household wastes (GOZ; 6-12months).

- **Long-term:**

- Explore new efficient & emerging technology (LT; 2-5 years)

Barriers & Challenges to Implementation

- Coordinate and synchronize the various actors engaging in community sensitization/ education related to behavior change campaign in solid wastes practice bylaws, regulations, willingness to pay for service etc
- To develop policy and indicative action plan for integrated SWM;
- To engage private sector on planning, management and coordination of SWM.

Lending and TA – Activities currently active or needed
