Nodal officers for security of elders

LEELIN KUMAR MALICK

Bhubaneswar, Dec. 6: Nodal officers will be appointed at police stations in urban and rural areas of Bhubaneswar and Cuttack to take care of problems faced by senior citizens.

Director general of police K.B. Singh made this announcement during an interface with the elderly people here today.

Singh told that despite manpower crunch, the state police were determined to look after the security of the senior citizens.

"A nodal officer would be there in each police station to look into the problems of the elderly people. The cops would visit them to know about their grievances," said Singh.

Security of senior citizens has come to focus after the murder of a septagenarian doctor couple in Sallahesee Vihar on November 15. However, the police are yet to arrest anyone in this case.

Senior citizen cell, which has been functioning in five police stations in Cuttack and

Senior citizens attend the meeting in Bhubaneswar on Sunday. Picture by Ashwinee Pati

Bhubaneswar since 2012, had 180 senior citizens registered with it. The number increased to 170 in 2013.

"By April this year, the number of registered citizens has increased to 1,668. A police officer in the rank of additional deputy commissioner of police is in the charge of the cell," said police commissioner R.P. Sharma adding that the cops had been providing special logos for cars of senior citizens. More than 75,000 senior

citizens live in Bhubaneswar. President of Federation of Senior Citizens' Association of Odisha Krupasindhu Sahoo said the police should frequently call on senior citizen who lived alone.

"The responsibility of the cops towards them should not end only with registrar. They should hold frequent meetings with them to know about their grievances," said Sahoo.

Cops advised the senior citizens to install closed circuit television cameras in their houses besides verifying the antecedents of domestic help before engaging them.

"We are also planning to keep a database of the elderly residents that would help us visit them frequently," said police official.

Senior citizens demanded the police to introduce a mobile-based application for them. "Police have recently launched mobile based application, Mo Saathi, especially for women in distress. A similar kind of app for senior citizens can definitely benefit us," said Santosh Moharana, senior citizen.

Smart city survey to spot change

BIHUTI BARIK

Bhubaneswar, Nov. 15: The municipal corporation is carrying out a baseline survey in the town centre district — 670 acres between Ashok Nagar and Maharshi College Road. The survey intends to build a database, which will help the authorities gauge the difference that the smart city project will make five years after it's implementation.

The survey, which started yesterday and is likely to continue for another day, intends to cover 40,000 people or 10,000 households, including business establishments.

Dutch organisation Bernard van Leer Foundation, which is a partner of the city body along with Hamara Bachpan Campaign and Delhi-based participatory research and evaluation body Praxix.

On the social development front, the people are being asked questions on their education, health centres and their distance from the residential locality. The survey also has

Volunteers from Siksha O Amsandhan University interact with a shop owner near the Master Canteen Square in Bhubaneswar on Sunday. Picture by Ashwinee Pati

has engaged volunteers for the survey. The survey intends to find out personal information of residents above 18 years, employment type, income level, house or establishment ownership, Internet and telephone connectivity access to education and mobility, public space and their use, especially for children, and community centre.

The questionnaire also has queries on the type of housing in which the respondents live, water supply source and consumption amount, sanitation facilities, including the frequency of garbage collection.

Country representative of Bernard van Leer Foundation, Dhritirishi Patnaik said: "The survey will definitely help the city body to include children, the smart city logo has their picture and

how the city centre has developed qualitatively and quantitatively five years after the implementation of the smart city project. The questions also have points on the formation and functionality of resident welfare associations and e-governance initiatives."

Sources said Bhubaneswar was probably going to be the only city in the country to have a child and family-friendly smart city.

"In order to include the issues during the launch of the citizens' interactions, the civic body first took suggestions from the children and their opinions will be included in the final smart city document," said a senior corporation official.

Municipal commissioner Krishan Kumar said: "In order to include children, the smart city logo has their picture and

Smart twist to kids' exhibits

OUR CORRESPONDENT

Bhubaneswar, Nov. 21: A school dedicating its annual exhibition to the smart city concept marks the popularity that the municipal corporation's campaign is gaining among residents.

Students of DAV Public School, Pokhariput, today organised its annual exhibition under the theme "Cleanliness and Smart City", in which over 250 students displayed their models, explaining areas in science, social studies, mathematics, life skills, yoga, art, dance and music — but with a smart twist.

"Every year the annual exhibition gets a theme. This year as the city is in the running to be listed as one of the first 20 smart cities in the country, we have decided to have a theme on the same," said principal Sujata.

Barnali Das, a Class VI student, said: "Various exhibits by students on the different com-

Students of DAV Public School, Pokhariput, take part at the annual exhibition in Bhubaneswar on Saturday. Picture by Ashwinee Pati

ponents of smart city, that is urban transport, drinking water supply, waste disposal, pollution control and maintaining green cover, were displayed through interesting models."

This afternoon, 500 students of Siksha O Amsandhan (SOA) University took part in a mass social media campaign and tweeted messages on various smart city themes. The students also

joined the Bhubaneswar Municipal Corporation's Facebook page with the intention of making the campaign popular on social media.

Satish Kumar Samal, who is pursuing his MTech from Institute of Technology Education and Research under the SOA, said: "Apart from taking part in social media campaigns, the varsity students had also volunteered to do a baseline sur-

vey on the smart district survey that held last week."

Mayor Ananta Narayan Jena said the city, with 53,300 members (at 6.10 this evening) on its Facebook page, is on the top of the chart from among the 20 cities, which are in the running to be developed as the first smart cities in the country. "Once the final proposal is submitted to the Centre, second-level citizens' connect activities will be organised," he said.

Jena said that engaging 11,300 people in various interactive sessions to find smart solutions such as urban mobility and waste disposal apart from choosing the smart district had helped the city get around 1.5 crore hits on social media in a month.

The corporation today organised a meeting of the transgender community and took their views and suggestions. These will be included in the final proposal of the smart city. A smart city lab was also organised at IIT Bhubaneswar.

Blind people are also suggested printing of city route maps in Braille to make it easy for the blind people to locate bus stands. "Invitations of all government meetings in Braille will help the blind people know details about them," she added.

BHUBANESWAR: Blind people, have mooted some ideas before the Smart City team of the Bhubaneswar Municipal Corporation (BMC) to make the city disabled-friendly.

Last week, the blind people discussed with team about their proposals. Another meeting regarding the issue would be held next week, said BMC sources.

The blind people, led by NGO Swabhimani, proposed installation of auditory signals at the traffic points. "As they could not see the traffic lights, the signals will help them," said Swabhimani chief Sruti Mohapatra. The auditory system is the sensory system for the sense of hearing.

Blind people are also suggested printing of city route maps in Braille to make it easy for the blind people to locate bus stands and the railway station to help blind people. Behera also mooted sensory parks in the city. "The parks will help the blind people feel the ambience, he added.

Other representative of blind people, Sanyas Behera, said human guides need to be deployed at the bus stands and the railway station to help blind people. Behera also mooted sensory parks in the city. "The parks will help the blind people feel the ambience, he added.

Odissha Association For Blind suggested establishment of a Braille library at Harekrushna Utpat State Library. "If the government sets up common facility centres in the libraries by printing readers for us, we will get updated about news," said a blind student.

BMC commissioner Krishan Kumar said they have received the proposals. "These would find place in the Smart City project. We will work on some of them according to our plan," said Kumar.

Citizens 'Mapping out' Smart City Plan

Express News Service

Bhubaneswar: The State Government is banking on ideas from citizens to design a SMART map for the Capital City. An initiative towards this step was adopted by the Bhubaneswar Municipal Corporation on Sunday with a series of Citizens' participations.

Transgenderers Suggest Smart City Proposals

Express News Service

Bhubaneswar: After taking view of the women, students, youth and senior citizens on shaping the future city, Bhubaneswar Smart City Mission on Saturday held discussions with the transgenderers.

Around 75 representatives from the community participated in the orientation meeting and suggested their plans for a smart city.

The transgenderers had filled up the off line idea box papers and submitted to the smart city team. Various ongoing activities for Bhubaneswar smart city were briefed to the participants.

Suggestions made by the

representatives are special toilets for the third genders, provisions of community hall for various social/recreational activities of the kinnars, employment opportunity and skill development, special ward in the Government hospitals and separate shelter homes. Among the participants, Meera Kinnar, Sadhana Kinnar, Megha Kinnar and president of Kinnar Sangha Pratap Sahu spoke.

BMC Additional Commissioner Alok Kar, Assistant Public Relations Officer Gopal Panigrahi, Preeti Prada Panigrahi, Anwishika and Smadhdhanjali Sahu of Humara Bachpan campaign were present.
